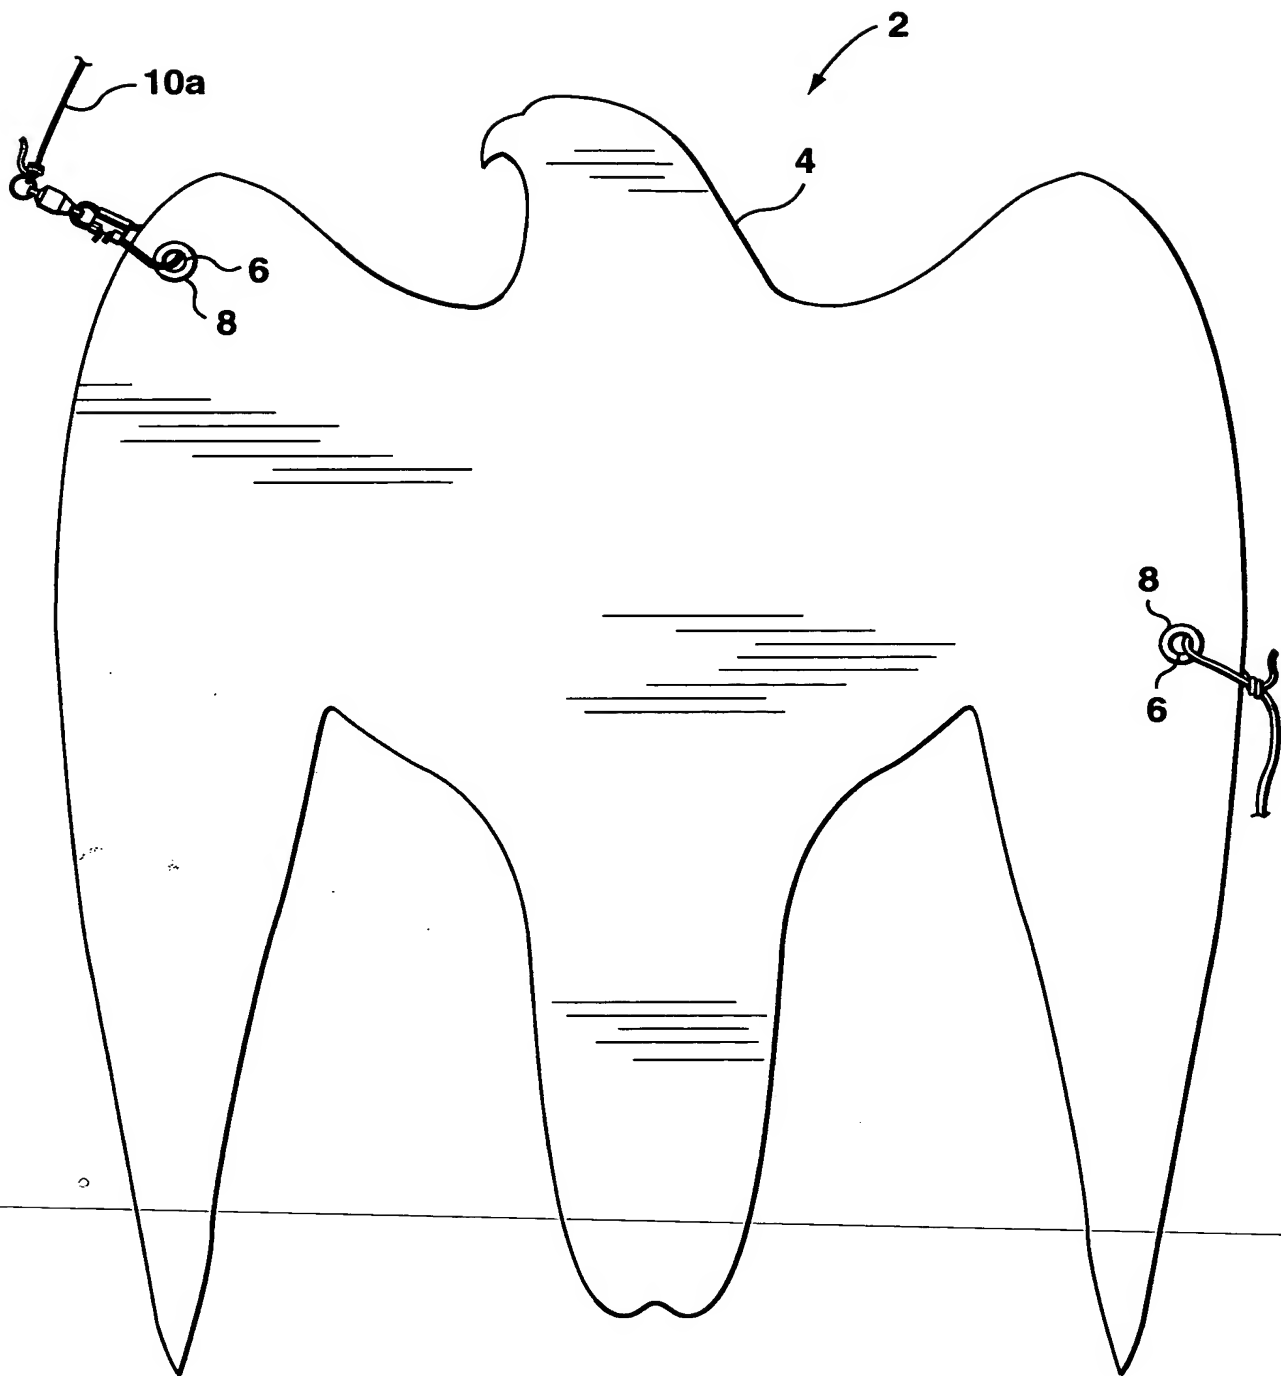

FIG. 1

Diagram illustrating a cable-stayed bridge structure. The bridge features a central pylon (2) and two side pylons (4). A central cable (10c) runs vertically through the bridge deck. The bridge deck is supported by stay ropes (12a, 12b) and cables (10a, 10b). The bridge deck is divided into sections (11c, 13c). The bridge deck is supported by a central pylon (2) and two side pylons (4). The bridge deck is supported by stay ropes (12a, 12b) and cables (10a, 10b). The bridge deck is divided into sections (11c, 13c). The bridge deck is supported by a central pylon (2) and two side pylons (4). The bridge deck is supported by stay ropes (12a, 12b) and cables (10a, 10b). The bridge deck is divided into sections (11c, 13c).
